

150MW lithium battery energy storage project

Utility Alabama Power is developing the state's first-ever utility-scale battery energy storage system at the site of a retired coal-fired generation plant. The new Gorgas Battery Facility will store up to 150 MW of electricity generated by other Alabama Power resources. Construction will begin this year, with estimated completion by . The lithium-ion phosphate batteries that will make up the system will have a 2-hour duration. Utility Alabama Power is developing the state's first-ever utility-scale battery energy storage system at the site of a retired Utility Alabama Power will develop the state's first utility-scale battery energy storage system (BESS) in Walker County, Alabama, US. The 150MW BESS will be built on a site that previously belonged to the Gorgas coal plant, which was retired in . Construction is expected to begin sometime this US clean energy platform Peregrine Energy Solutions LLC has obtained USD 168 million (EUR 154.3m) to finance the ongoing construction of a 150-MW battery energy storage system (BESS). The company said on Monday it has closed a USD-53-million preferred equity commitment with Bildmore Clean Energy Rendering of a 150MW BESS project Peregrine is planning in League City, Texas. Image: Peregrine Energy Developer Peregrine Energy Solutions has secured US\$168 million for a 150MW battery energy storage system (BESS) currently under construction. Peregrine closed a US\$53 million preferred equity The project in Hidalgo County, Texas, is set to become operational by mid-. Once in operation, the project aims to support economic growth by enhancing power supply reliability for critical industry sectors along the Gulf Coast. Credit: petrmalinak / Shutterstock.
