

48v inverter rectifier module

ETR+ RECTIFIER 48V, 3000W The ETR+ is a high efficiency rectifier module, designed and optimized for the demanding power needs in centralized or distributed architecture systems across various applications and industries. 48Vdc Cordex(TM) HP 4kW In a compact, fan-cooled design, Alpha's HP rectifiers open the possibility for immediate Opex/Capex savings, reducing total cost of ownership and impact on the environment, and are Flatpack2 Integrated power system With an efficiency of 97.8% the Super HE is a premium rectifier particularly suitable for markets and applications where the energy is costly. In grid connected applications the payback time is down to 2 years compared to DC Power Rectifiers and Power Supplies | 12V DC These versatile Rectifier Modules function as either power supplies or battery chargers for 12, 24 or 48 volt systems; positive, negative or floating ground. They may be employed singly or in combination, enabling the installer to Rectifier Module | 48vdc-rectifier-system | Rackinverter Rectifier module, Embedded Power System 3u dc 48v 150A switching power supply. Widely operating range of AC input voltage: 90~290Vac n. -48VDC Modular Rectifier System Product Feature 1) The rectifier module adopts active power factor compensation technology, and the power factor value reaches 0.99. 2) The normal working range of AC input voltage is wide to 90~290V, Single Cordex HP 48-4kW 208-240VAC Module Power limiting and wide range AC input for global installation requirements Extended operating temperature range up to 75°C for deployment in the harshest outdoor environments Backwards compatibility with Cordex; Alpha Technologies Cordex(TM) 1kW 48Vdc Modular Cordex rectifiers bring advanced technology to the DC power industry. Innovative engineering combines the best in efficiency and reliability meeting the power requirements for a variety of system applications. Cordex 650W 48Vdc Modular Rectifier Shelf Alpha Cordex 650W rectifier modules feature complete hot swappability, high efficiency with power factor correction, unique power limiting capability, and wide range input. Convection cooling and an ultra compact design also 48V Rectifier Modules Shop high-quality 48V rectifier modules from reliable suppliers. Enjoy robust performance and efficient power conversion for telecom and data center applications.ETR+ RECTIFIER 48V, 3000W The ETR+ is a high efficiency rectifier module, designed and optimized for the demanding power needs in centralized or distributed architecture systems across various applications and Flatpack2 Integrated power system With an efficiency of 97.8% the Super HE is a premium rectifier particularly suitable for markets and applications where the energy is costly.
