

Argentina solar off-grid system

The PERMER (Rural Electrification) project, led by the Energy Division of Argentina's Ministry of Economy, is doing a significant amount of good as a system of off-grid clean energy adoption aimed at supporting rural communities in the center of Argentina. Solar Energy in Argentina Solar thermal technology is even less developed, in part due to the low natural gas prices resulting from political strategies that aim to soften the impact of an unstable economy Distributed photovoltaic generation in Argentina: An analysis In isolated rural areas, off-grid PV systems provide a wide range of energy services (the off-grid segment) while, in small towns, distributed PV plants contribute to grid stability
