What is a modular inverter system?The new modular inverter system uses the IGBT (insulated gate bipolar transistor)-based power conversion system and provides high reliability with multiple-layer flexibility. The inverter has a customizable block with up to 6 units on the same skid. What is a central inverter?The central inverters are designed for large-scale solar power generation and provide high efficiency and reliability with low auxiliary power consumption. As the inverters ensure smart connectivity with controllability, digital grid compatibility is better with FIMER's decades-old experience and engineering know-how.
