How long are Enphase IQ8 microinverters warranted? In contrast, Enphase's IQ8 series microinverters are warranted for 25 years to match the length of most solar panel warranties. Use our easy solar panel calculator to get a quick estimate of how many solar panels you'll need for your home. Do microinverters need a centralized string inverter unit? Unlike optimizers, microinverters do not need a centralized string inverter unit to tie the system together. Instead, the inverting capabilities are handled by the microinverter unit itself. That means that each microinverter + panel pairing is like a mini self-contained solar power system. Are microinverters better than traditional inverters? Microinverters provide several advantages over traditional inverters. They are safer, easier to install, provide better shade tolerance, and allow for an expandable system. Like PV optimizers, microinverters attach to the back of each solar panel to optimize the system's output and allow for individual panel-level monitoring.
