

## China's grid-side energy storage power station

In May, China inaugurated the world's first lithium-sodium hybrid energy storage station in Yunnan. The 400 MWh facility combines abundant sodium resources with lithium technology to stabilize grids powered by renewable energy, underscoring a global shift toward diversified battery Utility-scale battery energy storage systems help electricity grids keep supply and demand in balance. They are increasingly needed to bridge the supply-demand mismatch caused by intermittent energy sources such as solar and wind. Chinese media outlet Yicai first reported that the deal, worth 4 billion yuan (about \$556 million), marked Tesla's expansion into China's burgeoning battery storage market. Amid lithium supply concerns, China's grid sees a sodium-lithium hybrid boost--Tesla joins the race with a \$556M push. Tesla has signed its first agreement to build a utility-scale battery storage facility in China, marking a significant step in the U.S. automaker's global energy strategy. The deal Tesla has signed its first agreement to develop a grid-scale battery storage power plant in China, a project that will become the largest of its kind in the country upon completion. The \$556 million deal, first reported by Chinese media outlet Yicai and confirmed by Tesla on Weibo, was signed with CHN Energy, was successfully connected to the grid. This marks the completion and operation of the largest grid-forming energy storage station in China. US electric car maker Tesla signed an agreement on Friday for its first grid-side energy storage project in the Chinese mainland, according to a statement the company sent to the Global Times on Friday. The project will be a model for international energy cooperation, attracting more global investment. SHANGHAI - US carmaker Tesla on Friday inked a deal with Chinese partners to build a grid-side energy storage station in Shanghai using its Megapack energy-storage batteries. The deal, with a total investment of 4 billion yuan (about \$556 million), marked Tesla's expansion into China's burgeoning battery storage market. Tesla agrees to build China's largest grid-scale battery power plant in Shanghai. Tesla has signed its first deal to build a grid-scale battery power plant in China amid a strained trading relationship between Beijing and Washington. Tesla to build China's biggest grid battery plant in Shanghai. In May, China inaugurated the world's first lithium-sodium hybrid energy storage station in Yunnan. The 400 MWh facility combines abundant sodium resources with lithium technology to stabilize Tesla to Build China's Largest Grid-Scale Battery Plant in Shanghai. Tesla signs a \$556 million deal to build China's largest grid-scale battery storage plant, marking its first utility-scale energy project in the country amid rising clean energy project in the country. Tesla to build China's largest grid-scale battery storage plant in Shanghai. The \$556 million project, involving over 100 Megapacks, aims to stabilize China's urban power grid. China's Largest Grid-Forming Energy Storage Station This marks the completion and operation of the largest grid-forming energy storage station in China. The photo shows the energy storage station supporting the Ningdong power plant. Tesla signs agreement to build its first Chinese grid-scale energy storage station. US electric car maker Tesla signed an agreement on Friday for its first grid-side energy storage project in the Chinese mainland, according to a statement the company sent to the Global Times on Friday. Tesla to build grid-scale energy storage station in Shanghai. US carmaker Tesla on Friday inked a deal with Chinese partners to
