

## Croatia What is an energy storage power station

The European Bank for Reconstruction and Development (EBRD) is providing a direct equity investment of up to EUR16.8 million in IE-Energy Projekt, a newly established joint-stock company developing a greenfield battery energy storage system (BESS) and virtual power plant (VPP) in Sibenik, Croatia. Croatia is taking a major leap forward in its green energy transition, backed by a significant investment from the European Bank for Reconstruction and Development (EBRD) and other key partners. The project involves the construction of a sophisticated 60 MW battery energy storage system (BESS) The European Bank for Reconstruction and Development (EBRD) is set to make a direct equity investment of up to EUR16.8 million in IE-Energy Projekt, a newly formed joint-stock company dedicated to developing a greenfield battery energy storage system (BESS) and a virtual power plant (VPP) in Sibenik As Croatia accelerates its renewable energy adoption, the Croatia Power Company Energy Storage Project emerges as a critical solution to balance supply fluctuations. With solar and wind contributing 18% of national electricity in (see Table 1), energy storage systems have become the missing The European Bank for Reconstruction and Development (EBRD) is providing a direct equity investment of up to EUR16.8 million in IE-Energy Projekt, a newly established joint-stock company developing a greenfield battery energy storage system (BESS) and virtual power plant (VPP) in Sibenik, Croatia. Croatia first grid-scale battery storage and virtual power plantThe European Bank for Reconstruction and Development (EBRD) is providing a direct equity investment of up to EUR16.8 million in IE-Energy Projekt, a newly established List of power stations in Croatia All power stations in Croatia are owned and operated by Hrvatska elektroprivreda (HEP), the national power company. As of , HEP operates 26 hydroelectric, 4 thermal and 3 Croatia battery storage: Impressive 60 MW System BackedThe project involves the construction of a sophisticated 60 MW battery energy storage system (BESS) combined with a virtual power plant (VPP) in Sibenik. Croatian startup to build largest battery system in Croatia got the green light from Brussels to give a EUR 19.8 million grant to a domestic startup for a massive energy storage project. IE-Energy is planning to build a battery system of 50 MW, which means it EBRD backs Croatia first large-scale battery storage plant The development will facilitate the installation of up to 60 megawatts of grid-connected battery storage capacity and the implementation of a VPP platform, enabling real EBRD invests EUR16.8mn in Croatia's first large-scale battery The project is expected to provide up to 60 megawatts of flexible capacity, helping to stabilise the national grid and support the integration of renewable energy sources. FER Takes Key Role in Battery Storage Study for Croatia's Battery energy storage systems offer a solution: they can significantly relieve grid congestion, improve system reliability, and enable a more sustainable and efficient use of Croatia Power Company Energy Storage Project A Blueprint for As Croatia accelerates its renewable energy adoption, the Croatia Power Company Energy Storage Project emerges as a critical solution to balance supply fluctuations. EBRD backs Croatia's first grid-scale battery storage and virtual The development will support the installation of up to 60 megawatts of grid-connected battery storage capacity and the deployment of a VPP platform, allowing real-time Plans

## Croatia What is an energy storage power station

announced for 245 MWh of battery storage projects in The Croatian battery news came in the wake of plans for a standalone utility-scale battery storage system in Serbia. The office of the Mayor of Leskovac revealed plans for a 125 Croatia first grid-scale battery storage and virtual power plant The European Bank for Reconstruction and Development (EBRD) is providing a direct equity investment of up to EUR16.8 million in IE-Energy Projekt, a newly established Croatian startup to build largest battery system in Southeastern Croatia got the green light from Brussels to give a EUR 19.8 million grant to a domestic startup for a massive energy storage project. IE-Energy is planning to build a battery EBRD invests EUR16.8mn in Croatia's first large-scale battery storage The project is expected to provide up to 60 megawatts of flexible capacity, helping to stabilise the national grid and support the integration of renewable energy sources. FER Takes Key Role in Battery Storage Study for Croatia's Power Battery energy storage systems offer a solution: they can significantly relieve grid congestion, improve system reliability, and enable a more sustainable and efficient use of EBRD backs Croatia's first grid-scale battery storage and virtual power The development will support the installation of up to 60 megawatts of grid-connected battery storage capacity and the deployment of a VPP platform, allowing real-time Plans announced for 245 MWh of battery storage projects in The Croatian battery news came in the wake of plans for a standalone utility-scale battery storage system in Serbia. The office of the Mayor of Leskovac revealed plans for a 125
