

Cyprus Communications 5G Base Station Subsidy

Does Cyprus have 5G? The Cyta 5G network offers full population coverage across Cyprus. With 100% population coverage, 5G is available in urban, suburban, and rural areas, ensuring high speeds and reliable connectivity wherever you are. This means that our customers can enjoy the benefits of 5G everywhere, whether in cities or remote locations.

Should Cyprus invest in FTTH & 5G infrastructure? The Government of Cyprus encourages the market to invest in Fibre to the Home (FTTH) and 5G infrastructure by providing the incentives related to regulatory certainty and measures. Public investments can only be used in areas where the market fails to develop and should be carefully targeted, so that they are not a deterrent to private investments.

Who can access Cyta 5G? The Cyta 5G network is accessible to all Contract and Prepaid Programme subscribers, individuals and businesses, at no extra charge and irrespective of any type of programme offered (RED, FREEDOM, FAMILY, YOUTH, soeasy Combo, Classic).

What is Cyprus' digital connectivity plan? Cyprus' digital connectivity plan sets strategic objectives for - and includes legislative and regulatory interventions as well as practical support for the development of digital connectivity infrastructure.

What radio frequency is used in Cyprus? In Cyprus, the radiowaves spectrum that has been licensed by the state (700MHz and 3.6 GHz) are very close to those frequencies that have been used for years by the existing mobile phone technologies and digital television. It is worth noting that home Wi-Fi frequencies operate at 2.4GHz and 5GHz.

Why do I need additional transmitters in Cyprus? This particular frequency requires additional transmitters due to the limited transmission of the signal in high frequencies such as this one. The radiofrequency spectrum licensed in Cyprus is at 700MHz and 3.6GHz that do not require additional transmitters than the existing ones.
