

## Flexible solar panels on sloped roofs

Do solar panels work on a flat roof? Many homeowners assume solar panels only work on sloped roofs, but that's a common solar myth. In fact, flat roof homes can be well-suited for solar, with benefits like flexible panel placement, easier access, and a low-profile look. With the right installer and mounting system, a flat roof can support a high-performing solar setup.

Can you install solar shingles on a flat roof? You shouldn't install solar shingles on a flat roof. They won't be efficient, they'll collect dirt, and they'll pool water. Also, flat roofs don't usually have shingles anyway, so you won't reap the same aesthetic benefits as a sloped roof. We recommend only installing properly mounted solar panels on a flat roof.

Can solar panels be laid flat? Solar panels shouldn't be laid flat. To maximize their time in the sun, solar panels should ideally face south and tilt between 15 and 40 degrees. Most sloped roofs are in this angle range, which makes for an easy installation. But that doesn't mean that flat roofs aren't fit for solar, too. How does a flat roof solar system work? Instead, flat roof systems often use a weighted mounting system called a "ballast system," which uses gravity to keep your equipment in place. Solar panel systems on flat roofs often perform better than those on sloped roofs, resulting in better long-term savings.

What are hidden solar panels on a flat roof? Hidden solar panels on flat roofs can provide a sleek aesthetic without compromising energy production. Low-profile mounting systems offer an elegant solution for reducing the visibility of solar panels on flat roofs. These systems keep the panels close to the roof surface, minimizing their profile from street view.

How do I install solar panels on a flat roof? The process of installing solar panels on a flat roof involves selecting the right mounting system. Options include ballasted systems, which use weights to hold the panels in place, or racking systems that adjust to secure panels without penetrating the roof surface.
