

Gambia Enterprise solar Power Generation and Energy Storage System

Gambia's National Water and Electricity Company (NAWEC) is making significant strides in its ambitious solar expansion project. Central to this initiative is the installation of a large-scale photovoltaic plant in Jambur village, complemented by a state-of-the-art battery energy storage system. (BANJUL, The Gambia) - The Gambia's National Water and Electricity Company (NAWEC), in collaboration with the World Bank, has officially launched the bidding process for a landmark 50-megawatt solar power and energy storage project aimed at transforming the country's electricity.

On Saturday, at a historic occasion in the Community of Kombo Jambur, President Barrow led the official inauguration ceremony of the now completed 23 Megawatt Solar Plant and an eight Megawatt Battery Energy Storage System. On February 4, , President Barrow laid the foundation stone to mark the start of the project. Gambia's National Water and Electricity Company (NAWEC) is seeking proposals for a 50 MW PV facility planned to be deployed in Soma, south of the River Gambia. The project is part of a broader solar project eventually including unspecified battery storage capacity. Gambia's Ministry of Petroleum and Energy (MoPE) and state-owned utility NAWEC have jointly launched a tender for the construction of a 50MW Solar Storage System in Soma, south of the River Gambia. The PV facility is part of a 150 MW solar project under development since which is planned to be able to cover the forecast demand. A gap between available capacity and peak demand is identified from with the expiration of the Karpower contract and by electricity from Senegal and/or Cote d'Ivoire. This project will enable the power grid of the future. Therefore, in summer 2023, Gambia Tenders 50 MW Solar Project in It is designed not only to enhance energy generation capacity but also to introduce robust battery storage to stabilize and optimize electricity distribution across the country.

Gambia's Biggest 23 MW Solar Plant Opens On Saturday, at a historic occasion in the Community of Kombo Jambur, President Barrow led the official inauguration ceremony of the now completed 23 Megawatt Solar Plant and an eight Megawatt Battery Energy Storage System. Gambia launches tender for 50 MW solar-plus battery energy storage system. Gambia's National Water and Electricity Company (NAWEC) is seeking proposals for a 50 MW PV facility planned to be deployed in Soma, south of the River Gambia. The project is part of a broader solar project eventually including unspecified battery storage capacity.
