Does Georgia Power have a new battery energy storage system? ATLANTA, Aug. 29, /PRNewswire/ -- Georgia Power has identified locations for 500 MW of new battery energy storage systems (BESS) authorized by the Georgia Public Service Commission (PSC) earlier this year as part of the company's Integrated Resource Plan (IRP) Update. Who sanctioned battery energy storage systems in Georgia? The systems are sanctioned by the Georgia Public Service Commission through the Integrated Resource Plan. Credit: Georgia Power. US-based electric utility Georgia Power has commenced construction of new battery energy storage systems (BESS) across the state of Georgia, totalling 765MW capacity. How many energy storage facilities will Georgia have? This deal, one of the largest of its kind in the United States, will see the installation of eleven energy storage facilities across eight locations throughout the state. The deal, while close to being finalized, is still pending approval by the Georgia Public Service Commission (PSC), but that approval is expected to be granted. What type of energy does Georgia Power use? Committed to delivering clean, safe, reliable and affordable energy, Georgia Power maintains a diverse, innovative generation mix that includes nuclear, coal and natural gas, as well as renewables such as solar, hydroelectric and wind. Who is Georgia Power? Georgia Power is the largest electric subsidiary of Southern Company (NYSE: SO), America's premier energy company. Value, Reliability, Customer Service and Stewardship are the cornerstones of the company's promise to 2.7 million customers in all but four of Georgia's 159 counties. What do we know about Georgia Power Projects? Georgia Power included attachments with information and data on each of the proposed projects, but since they contained "sensitive terms and conditions" and cost information, they were nearly entirely redacted from public disclosure- deemed "trade secrets." Here's what we do know about those projects: Georgia Power requests PSC permission to Aug 4, – Georgia Power has requested certification from the Georgia Public Service Commission (PSC) for 9,900MW of new generation resources, including more than 3GW of battery storage that the utility would own. Here's where Georgia is installing 500 MW of new battery Aug 28, – Although the state is just starting to explore the possibilities of battery energy storage, Georgia has been a hotbed for renewable energy development since the passage of Georgia Power determines locations for 500 ATLANTA, Aug. 29, /PRNewswire/ -- Georgia Power has identified locations for 500 MW of new battery energy storage systems (BESS) authorized by the Georgia Public Service Commission (PSC) Georgia Power secures Tesla battery supply Sep 5, – Georgia Power has secured a battery and equipment supply agreement (BESA) with Tesla for a 500MW/2,000MWh BESS portfolio made up of four projects of varying sizes under development by the investor Georgia Power advances battery storage May 8, – US-based electric utility Georgia Power has commenced construction of new battery energy storage systems (BESS) across the state of Georgia, totalling 765MW capacity.
