How do I configure 5G Wi-Fi? In the navigation tree on the left, choose **Advanced > WLAN > 5G Basic Network Settings**. In the right pane, configure the basic parameters of the 5G Wi-Fi network, as shown in Figure 8-52. Click **Apply**. The table below describes the basic parameters of the 5G Wi-Fi network. Indicates whether to enable the wireless network. What if my phone is not getting 5G signal? This is service dependent but could be grayed out if phone isn't getting 5G signal. Get with AT& T to see if they can resolve it. Resetting network settings may help but this will clear your WiFi network history. 05-04- AM in Could you post a screenshot please? 05-04- AM in 05-04- AM in Have you contacted your carrier? Why should I enable 5G on a Samsung device? They can verify your account configuration and troubleshoot any network-related issues. Enabling 5G Standalone on a Samsung device provides access to the full potential of 5G technology, including lower latency, increased network capacity, and advanced features like network slicing. What are the components of a 5G base station? Baseband Unit (BBU): Handles baseband signal processing. Remote Radio Unit (RRU): Converts signals to radio frequencies for transmission. Active Antenna Unit (AAU): Integrates RRU and antenna for 5G-era efficiency. 2. Power Supply System This acts as the "blood supply" of the base station, ensuring uninterrupted power. It includes: What does 5G Sa Mean? This setting determines the preferred cellular network technology your device will use. Select 5G Standalone (if available): If your device and network support 5G SA, you may see an option specifically labeled '5G Standalone,' '5G SA,' or something similar. Selecting this option forces your device to prioritize 5G SA connectivity when available. How do I enable 5G SA on my Samsung device? The exact steps for enabling 5G SA may vary slightly depending on your Samsung device model and software version. However, the general process typically involves the following: Access Settings: Open the 'Settings' application on your Samsung device. Connections/Network & Internet: Navigate to the 'Connections' or 'Network & Internet' section.
