What is a Huawei inverter? Huawei inverters are becoming a benchmark for solar energy in residential and commercial applications. Huawei is a well-known brand in the solar energy sector.

Who owns Huawei solar inverter? Huawei are reportedly owned by their employees, hmmm maybe, but definitely World No.1 solar inverter manufacturer for the past 6 years. Most people know the brand because they are World No.2 behind Samsung in smart phones. Huawei were the first to develop and release a 5G chip and had big hopes of installing the 5G networks in Australia.

Does a Huawei inverter have a phone number? Yes, there is a phone number for Huawei inverters. Also, for those of you waiting for the 5 and 6kW three phase hybrid inverters, they won 'Best inverter' at Intersolar and will be landing mid October with an RRP of \$2,000. Do Huawei inverters have a warranty? It just depends on how and when the shade happens as to what solution is implemented, but at least Huawei have all the tools available. All Huawei inverters have a full 10 year parts and labour, new for old replacement warranty. Unlike most other manufacturers, they do not provide 'refurbished' units for warranty replacement. Are Huawei battery inverters out in Australia? Huawei battery inverters have been available in Australia since Jan . Initially, they used the NetEco reporting platform, which commercial inverters in Australia had used for a longer time. About a year ago, they launched FusionSolar (app and web browser) for their residential inverters.

Do Huawei inverters use optimisers? The optimisers are typically used for spreading strings of panels over multiple roof orientations. e.g. North facing string with 8 panels could have another 4 optimised panels installed on East roof. Huawei inverters can work with no optimisers, fully optimised, or selective deployment only where needed.
