

Huawei produces solar panels in the United Arab Emirates

While being a major oil producing country, the United Arab Emirates (UAE) has taken steps to introduce solar power on a large scale. However, solar power still accounts for a small share of energy production in the country. The country was the 6th top carbon dioxide emitter per capita in the world in 2014, with 40.31 tonnes, but is planning to generate half of its electrical energy by 2050 from solar.

On Thursday, Phanes Group and Huawei announced the roll-out of a 25.8MW rooftop solar portfolio all over the Persian Gulf state, featuring the Chinese giant's SUN2000- (8-40)KTL smart string inverters. Immersive Virtual Visit to Reference Projects, Exhibition Halls, etc. FusionSolar is a leading UAE provider of solar solutions, partnering with professional installers, utilities, and other stakeholders to promote sustainable and efficient use of renewable energy. We can offer powerful solar solutions. This is currently the largest distributed development in the UAE and has a unique composition of different project types, including warehouses, carports, and commercial buildings.

DUBAI, United Arab Emirates /PRNewswire/ -- Phanes Group, an international end-to-end solar provider headquartered in Dubai UAE, has partnered with Huawei to deliver the UAE's first medium voltage (MV) rooftop connection solar project. The 25.8MW distributed rooftop project was developed for DP World. The development includes 88,000 plus solar panels, Huawei's SUN2000- (8-40)KTL all series Smart String Inverters.

While being a major oil producing country, the United Arab Emirates (UAE) has taken steps to introduce solar power on a large scale. However, solar power still accounts for a small share of energy production in the country. The country was the 6th top carbon dioxide emitter per capita in the world in 2014. Solar energy is heat and radiant light from the Sun that can be harnessed with technologies such as solar power (used to generate electricity) and solar thermal energy (used for applications such as water heating). The United Arab Emirates solar energy market is segmented by technology and application.

United Arab Emirates (UAE) has witnessed the installation of what is being billed as its leading distributed solar project to date, scattered across dozens of locations. On Thursday, Phanes Group and Huawei announced the roll-out of a 25.8MW rooftop solar portfolio all over the Persian Gulf state. Huawei and Phanes Group power the largest distributed solar project in the UAE.
