What is DOE's strategic investment in energy storage? DOE's strategic investment in energy storage aims to ensure that all Americans have access to energy storage innovations to enable resilient, reliable, secure, and affordable electricity systems and supplies. What is the energy storage strategy & roadmap (SRM)? WASHINGTON, D.C. - The U.S. Department of Energy (DOE) today released its draft Energy Storage Strategy and Roadmap (SRM), a plan that provides strategic direction and identifies key opportunities to optimize DOE's investment in future planning of energy storage research, development, demonstration, and deployment projects. What is the energy storage SRM? Specifically, the draft Energy Storage SRM updates the earlier ESGC Roadmap in consideration of the progress made across the energy storage sector since , as well as reflects DOE's recent activities in support of its energy storage mission and vision. What is a storage management plan (SRM)? This SRM outlines activities that implement the strategic objectives facilitating safe, beneficial and timely storage deployment; empowering decisionmakers by providing data-driven information analysis; and leveraging the country's global leadership to advance durable engagement throughout the innovation ecosystem. Is DOE preparing a draft energy storage SRM for public comment? DOE is seeking comment from stakeholders to inform its draft Energy Storage SRM for public comment at a future time; notice of its availability will be provided through the Federal Register through a formal NOA. Interested stakeholders can view both the draft SRM and the official NOA.
