

## Inverter 9V to 220V

DC to AC Power Inverter 9V 220V Inverter A 9V DC to 220V AC power inverter is a compact yet powerful device that converts low-voltage direct current (DC) from batteries into standard alternating current (AC), enabling the operation of various AC-powered devices.

If you have a single IC in your electronic junk box, along with a transformer and a few power transistors, you are probably all set to create your simple power inverter circuit using these components. The basic design of the proposed IC based inverter circuit can be visualized in the above diagram. The concept is basically the same, we use a transformer to step up the voltage from the DC source to the AC output.
