

Lithuania's new outdoor power supply market

Does Lithuania need a new energy system? Lithuania imports a large share of its electricity needs, while bioenergy is taking the lead in domestic energy supply. By 2030, Lithuania wants to reduce its electricity imports by half and produce 70% of its electricity needs from domestic sources. It plans to complete its synchronisation with the continental European power system by early 2025. Does Lithuania import electricity? Since then, the shares of electricity imports, natural gas and bioenergy have increased. Today, Lithuania imports over 70% of its electricity needs, while bioenergy is taking the lead in domestic energy supply. How has Lithuania's energy policy changed in 2024? Lithuania's electricity generation from renewable sources nearly doubled between 2015 and 2023, boosted by improved permitting and support schemes. The policy changes also contributed to an increase in home installations of solar PV and in grid-scale battery storage. Is Lithuania part of the Baltic-Nordic electricity market? Lithuania is part of the highly interconnected Baltic-Nordic electricity markets. An even greater integration with the EU energy system is a core policy objective, with the milestone of reaching full synchronisation with the European continental electricity grid by 2025. Will Lithuania cut imports of Russian energy supplies from Sunday? Lithuania will have completely cut imports of Russian energy supplies including oil, electricity and natural gas from Sunday. This comes a day after Russia stopped its natural gas exports to Finland. What is Lithuania's energy policy? "Energy independence is the foundation of Lithuania's energy policy," said Lithuania's Energy Minister Zygimantas Vaiciunas. "We have taken bold steps to strengthen our security, from strategic infrastructure investment to full synchronisation with the continental European electricity grid.
