

## New Energy Storage Safety

Energy Storage Safety Strategic PlanThe Department of Energy Office of Electricity Delivery and Energy Reliability Energy Storage Program would like to acknowledge the external advisory board that contributed to the topic Battery Energy Storage Systems: Main Considerations for Safe This webpage includes information from first responder and industry guidance as well as background information on battery energy storage systems (challenges & fires), BESS Battery Storage Industry Unveils National Blueprint for SafetyTo that end, the energy storage industry has developed a three-part strategy that includes policy recommendations and safety requirements aimed at holistically addressing Former FDNY officials declare battery energy Six former New York City fire safety officials and experts have issued a joint declaration affirming the safety of battery energy storage systems under New York state's newly updated Energy Storage for New York State New York State worked with top experts around the country to create and improve the regulations around energy storage. These regulations are some of the strictest in the United States and are supported by careful reviews Safety Risks and Risk Mitigation Apart from Li-ion battery chemistry, there are several potential chemistries that can be used for stationary grid energy storage applications. A discussion on the chemistry and potential risks Energy Storage Systems Safety Fact Sheet Download the safety fact sheet on energy storage systems (ESS), how to keep people and property safe when using renewable energy. US EPA issues BESS safety guidance and Multiple towns in Long Island enacted moratoriums on energy storage by the end of , following four energy storage incidents that, though minor, struck a chord with residents. New York incorporates lithium-ion battery safety into draft fire New York has issued draft language updating and expanding its fire code to include lithium-ion battery energy storage system safety recommendations issued in February by a EPA issues battery storage safety guidelinesEPA has issued what it called the first comprehensive federal safety guidance for battery energy storage systems (BESS), outlining best practices for siting, installation, operation andEnergy Storage Safety Strategic PlanThe Department of Energy Office of Electricity Delivery and Energy Reliability Energy Storage Program would like to acknowledge the external advisory board that contributed to the topic Former FDNY officials declare battery energy storage systems safe Six former New York City fire safety officials and experts have issued a joint declaration affirming the safety of battery energy storage systems under New York state's Energy Storage for New York State New York State worked with top experts around the country to create and improve the regulations around energy storage.
