

New Regulations on New Energy Power Generation and Energy Storage

What is the final rule on electric storage resources?The final rule applies to electric storage resources, which the Commission defined as any "resource capable of receiving electric energy from the grid and storing it for later injection of electric energy back to the grid." Should market rules be designed for electric storage technology?This expansive, resource-neutral definition underscores the Commission's view that market rules should not be designed for any particular electric storage technology. What does FERC consider a battery storage resource (IBR)?FERC considers IBRs to include all generation resources that connect to the electric power system using power electronic devices that change direct current (DC) power produced by a resource to AC power, including battery storage resources. What are FERC regulatory developments?Regulatory developments include FERC's actions on electric storage resources participating in the wholesale markets, co-location of large electric loads, qualifying facility eligibility, and reliability rules for inverter-based resources. What is energy storage & why is it important?Energy storage, with its versatile applications as a simultaneous load, generation, and ancillary service resource, is poised to provide flexibility to large electricity customers that seek to pursue co-location configurations. When will FERC adopt IBR-related reliability standards?As required by Order No. 901, NERC developed the first two of the expected suite of IBR-related reliability standards, which FERC proposed to adopt through the issuance of a notice of proposed rulemaking (NOPR) in December . The bill incentivizes new storage projects, which state officials at the Illinois Power Agency found will suppress electricity prices in an analysis they provided to lawmakers. It also mandates new programs to decrease strain on the grid, like energy efficiency programs. The bill incentivizes new storage projects, which state officials at the Illinois Power Agency found will suppress electricity prices in an analysis they provided to lawmakers. It also mandates new programs to decrease strain on the grid, like energy efficiency programs. SPRINGFIELD -- A closely-watched and long-debated piece of energy legislation is set to become law after passing through both legislative chambers with the governor's endorsement. The bill that cleared the General Assembly Thursday funds energy storage systems through a new charge to Illinois U.S. Secretary of Energy Chris Wright directed the Federal Energy Regulatory Commission today to initiate rulemaking procedures with a proposed rule to rapidly accelerate the interconnection of large loads, including data centers, positioning the United States to lead in AI innovation and in the Analysis Details Electricity Market Design Reforms to Unlock the Potential of Storage WASHINGTON, D.C., April 8, -- Today the American Clean Power Association (ACP) released an Energy Storage Market Reform Roadmap and analysis produced by the Brattle Group, outlining several key reforms that Lawmakers OK sweeping energy reform package that governor The bill incentivizes new storage projects, which state officials at the Illinois Power Agency found will suppress electricity prices in an analysis they provided to lawmakers. It also How Recent FERC Orders Are Regulating Electric Regulatory developments include FERC's actions on electric storage resources participating in the wholesale markets, co-location of large electric loads, qualifying facility eligibility, and reliability rules for inverter US states advance energy storage and grid State

New Regulations on New Energy Power Generation and Energy Storage

lawmakers across the United States made efforts in the second quarter of to modernize electric grids, according to the 250 States of Grid Modernization: Q2 Quarterly Report" from Secretary Wright Acts to Unleash American U.S. Secretary of Energy Chris Wright directed the Federal Energy Regulatory Commission today to initiate rulemaking procedures with a proposed rule to rapidly accelerate EPA Announces Permitting Reform to Provide Clarity, Expedite WASHINGTON - Today, U.S. Environmental Protection Agency (EPA) Administrator Lee Zeldin announced new guidance on New Source Review (NSR) U.S. Energy Department, power grid, new regulations, FERC, The U.S. Energy Department has introduced new rules to overhaul the power grid, addressing soaring demand and promoting clean energy. FERC's approval aims to expedite Clean energy group releases safety-focused model ordinance for States and municipalities can use a model ordinance framework published by the American Clean Power Association to develop regulations for permitting, siting, safety, Mexico Releases New Regulations For Power Generation And Mexico's National Energy Council (CONAE) published the "General Administrative Provisions" in its Official Gazette, clarifying the legal, technical, and financial criteria for New Report: Market Reforms to Harness Energy California and Texas have demonstrated that with updated market rules, energy storage delivers substantial value and complements both thermal and renewable generation to meet the unique reliability Lawmakers OK sweeping energy reform package that governor The bill incentivizes new storage projects, which state officials at the Illinois Power Agency found will suppress electricity prices in an analysis they provided to lawmakers. It also How Recent FERC Orders Are Regulating Electric Storage, QFs, Regulatory developments include FERC's actions on electric storage resources participating in the wholesale markets, co-location of large electric loads, qualifying facility US states advance energy storage and grid reforms in Q2 State lawmakers across the United States made efforts in the second quarter of to modernize electric grids, according to the 250 States of Grid Modernization: Q2 U.S. Energy Department, power grid, new regulations, FERC, clean energy The U.S. Energy Department has introduced new rules to overhaul the power grid, addressing soaring demand and promoting clean energy. FERC's approval aims to expedite Clean energy group releases safety-focused model ordinance for energy States and municipalities can use a model ordinance framework published by the American Clean Power Association to develop regulations for permitting, siting, safety, Mexico Releases New Regulations For Power Generation And Energy Storage Mexico's National Energy Council (CONAE) published the "General Administrative Provisions" in its Official Gazette, clarifying the legal, technical, and financial criteria for New Report: Market Reforms to Harness Energy Storage and California and Texas have demonstrated that with updated market rules, energy storage delivers substantial value and complements both thermal and renewable generation to Top 9 Energy Legislative Trends Impacting Storage, Policies focused on grid modernization, renewables, resilience, and energy storage. Explore the top nine legislative trends shaping the future of storage, distributed Lawmakers OK sweeping energy reform package that governor The bill incentivizes
