

## New Zealand energy storage projects

NZ's proposed pumped storage hydropower If the proposed pumped hydro scheme at Onslow goes ahead and is managed well, it could be a major asset to diversify a low-carbon, self-resilient economy in Aotearoa New Zealand. NZ Battery Project The Saft battery division of French energy and petroleum multinational TotalEnergies will supply 70 of its containerized Intensium Shift+ battery energy storage New Zealand's 'first grid-scale battery storage The country's government is known to be considering the development of large-scale pumped hydro energy storage (PHES) facilities to provide long-duration energy storage that would enable bulk integration of Building New Zealand's battery future at Huntly In a major step forward for New Zealand's renewable energy future, Genesis Energy has commenced construction on a 100 MW / 200 MWh Battery Energy Storage System (BESS) adjacent to the iconic Huntly Power Saft energy storage system to support New Zealand's transition Saft lithium-ion technology will provide 100 MW power and 200 MWh storage capacity to support grid stability as intermittent wind and solar power increases in New Zealand Launch of New Zealand's first utility-scale Battery Energy Storage The BESS is set to deliver huge benefits to the Waikato by providing an energy storage facility which will improve the resilience of the New Zealand electricity system, while New Zealand's first grid-scale battery energy storage systemA large-scale grid-connected battery energy storage system is to be built at Ruakaka on North Island, thought to be the first of its kind in New Zealand. Meridian Energy Completes New Zealand's First Large-Scale Meridian Energy has completed construction of New Zealand's first large-scale grid-connected battery energy storage system (BESS) at Ruakaka, with an official opening Eku Energy enters NZ with 300 MW battery project Eku Energy has acquired a 300 MW battery energy storage project in New Zealand's Waikato region, marking its entry into the country. The project will be co-developed with Auckland-headquartered solar NZ's proposed pumped storage hydropower project will cost If the proposed pumped hydro scheme at Onslow goes ahead and is managed well, it could be a major asset to diversify a low-carbon, self-resilient economy in Aotearoa NZ Battery Project The NZ Battery Project was set up in to explore possible renewable energy storage solutions for when our hydro lakes run low for long periods. A pumped hydro scheme Saft to supply 200 MWh battery storage project in New ZealandThe Saft battery division of French energy and petroleum multinational TotalEnergies will supply 70 of its containerized Intensium Shift+ battery energy storage New Zealand's 'first grid-scale battery storage project' in The country's government is known to be considering the development of large-scale pumped hydro energy storage (PHES) facilities to provide long-duration energy storage Building New Zealand's battery future at Huntly Power StationIn a major step forward for New Zealand's renewable energy future, Genesis Energy has commenced construction on a 100 MW / 200 MWh Battery Energy Storage System (BESS) Eku Energy enters NZ with 300 MW battery project purchaseEku Energy has acquired a 300 MW battery energy storage project in New Zealand's Waikato region, marking its entry into the country. The project will be co-developed NZ's proposed pumped storage hydropower project will cost If the proposed pumped hydro scheme at Onslow goes ahead and is managed well, it could be a major asset to diversify a low-
