What is a Bess battery? A BESS is as it sounds, it's a series of batteries that are arranged in a system to store energy to be used at a later time. Typically, a BESS consists of multiple batteries that start at the cell level which can range in shape and size from pouches to cylinders. For simplicity, think of an extremely large AA battery. Is a Bess a small or medium system? The table below defines whether a BESS is considered Small, Medium or Large. Small systems do not require filing with FDNY or DOB for approval, whereas Medium systems require inspections and Large systems require filings with the DOB and FDNY. What are the requirements for a Bess installation site? Site Specific - In addition to the above, there are requirements for setbacks, signage, fencing, fire hydrants, remote monitoring, recordkeeping and others.
