

Outdoor Power Expander

How do you extend a power receptacle outside?The quickest way to extend power outdoors is to install a receptacle back-to-back with one inside the house. You also can drill through the wall from a basement or crawlspace and attach a receptacle on the side of a house using an extension ring. You'll want to position an outdoor receptacle at least 16 inches above the ground. How do you bring power outside?One way to bring power outdoors is with back-to-back receptacles. Shut off power, pull out an indoor receptacle, and drill a locator hole through the wall to the outside. Was this page helpful? What is the best outdoor power strip?My top pick, the APS IPX6 9-in-1 Outdoor Power Strip, is waterproof, durable, and includes a mixture of three-prong outlets and USB plugs. See which other models I recommend below. The outdoor power strips below are the best of the bunch. My selections range from small three-outlet power strips up to large capacity 10-outlet models. Are outdoor power strips weather resistant?Outdoor power strips come in a variety of sizes, from small three-outlet models up to large 10-outlet beasts. Unlike indoor models, these rugged, weather-resistant power strips can endure extreme temperatures and even downpours. Understanding what weather conditions an outdoor power strip is rated to handle is key to purchasing the right one.
