

Pack battery assembly plant in Morocco

The state-of-the-art facility, to be located in Kenitra, Morocco, represents a 12.8 billion dirham (\$1.3 billion) investment and promises to generate 17,000 jobs. The announcement was made during a signing ceremony in Rabat on June 6th, presided over by Prime Minister Aziz Akhannouch. Since , several Chinese lithium battery industry chain companies, including CATL, Gotion High-Tech, Sunwoda, BTR, Huayou Cobalt, CNGR Advanced Material and Tinci Materials, have collectively invested in Morocco and built factories. The battery industry chain centered around LFP is forming Chinese battery giant Gotion High-Tech will invest up to 1.3 billion euros in Morocco to build a lithium battery plant. Officially announced today, this "gigafactory," the first of its kind in Morocco for electric vehicles, represents an initial investment of 1.3 billion dollars (12.8 billion China's Gotion High-Tech Group is preparing to launch the construction of the first and largest factory for electric vehicle (EV) batteries and renewable energy storage in Africa, with an allocated budget exceeding \$5 billion, according to a report published Monday by Business Insider. According to Thanks to its natural resources, advantageous geographical position and strategic partnerships with global players, Morocco aims to become a regional hub for sustainable technologies for Africa and Europe by investing heavily in the lithium and electric battery industry. The country aims to develop According to a report done by , the government of Morocco has confirmed that the new Gotion EV Battery Gigafactory European factory is planned to be set up in the region at an estimated cost of \$1.3 billion which is equivalent to 12.8 billion Moroccan dirhams. As revealed by a press release China 's Gotion High Tech will build Morocco's first EV battery gigafactory at a total cost of 12.8 billion dirhams (\$1.3 billion). The Moroccan government made this development known on Thursday. Gotion High Tech is the latest company to invest in EV battery manufacturing in Morocco, as the Morocco Emerges as a LFP Battery Hub for Tinci Materials plans a factory in Morocco with an annual production of 300,000 tons of lithium battery materials. Huayou Cobalt and LG Energy Solution will co-build a plant in Morocco, one for 50,000 tons Morocco Attracts Battery Giant Located near Casablanca, the plant will have an initial capacity of 20 gigawatt-hours (GWh), expandable to 100 GWh, bringing the total investment to 6.5 billion dollars. This project aligns with Morocco's China's Gotion High-Tech to Build Africa's Largest EV Battery China's Gotion High-Tech Group is preparing to launch the construction of the first and largest factory for electric vehicle (EV) batteries and renewable energy storage in Africa, Morocco, the future regional hub for lithium and With the opening of a first production unit for lithium-ion battery materials in Jorf Lasfar, COBCO has begun the creation of a strategic industrial ecosystem in Morocco dedicated to electric mobility and energy \$1.3 Billion Gotion EV Battery Gigafactory Planned As revealed by a press release by the prime minister of Morocco, stated that Gotion has just signed an investment deal with the Chinese company to build Morocco's first \$1.3 In May, Chinese auto battery manufacturers Hailiang and Shinzoom announced plans to set up two separate plants near Tangier, producing key EV battery components: copper and anodes, Morocco to Build \$1.3 Billion Electric Battery The state-of-the-art facility, to be located in Kenitra, Morocco, represents a 12.8 billion dirham (\$1.3
