

## Philippines energy storage battery BESS latest

Meralco PowerGen Corporation (MGEN) announced the 49MW battery energy storage system (BESS) project in the City of Toledo, Cebu, yesterday (21 July). Set to be constructed and brought online in two phases, the first 25MW phase is planned for the start of commercial operation. The Philippines is betting on battery energy storage systems (BESS) to achieve its ambitious renewable energy (RE) targets and build a more sustainable energy future. With goals of 35-percent RE in the generation mix by 2030 and 50 percent by 2040, the Department of Energy (DOE) sees BESS as a strategic move valued at approximately \$21 billion. Aboitiz Power is integrating BESS technology into its existing thermal plants, a model for clean energy that is being closely watched by national utilities as a blueprint for climate-resilient infrastructure. The groundbreaking for the Philippine Department of Energy (DOE) has cleared 21 battery energy storage system (BESS) projects for system impact studies (SIS) with the National Grid Corporation of the Philippines (NGCP) in May. The projects represent a combined 3,494.786 MW of capacity and 1,108.448 MWh of BESS power. The Asian Development Bank (ADB) and the Global Energy Alliance for People and Planet (GEAPP) have joined forces to launch ENABLE (Enhancing Access to Battery Energy Storage System for Low-carbon Economies). This innovative platform is designed to rapidly accelerate the adoption of battery energy storage. The Philippines has officially launched its first hybrid solar and Battery Energy Storage System (BESS) facility, marking a historic milestone in the country's renewable energy development. President Ferdinand R. Marcos Jr. inaugurated the CS Batangas 1 project in Tuy, Batangas, with the Energy Development Corporation (EDC) as the lead agency. DNV has supported SN Aboitiz Power Group on the development of a 24MW/32MWh Battery Energy Storage System (BESS) co-located with the Magat Hydroelectric Power Plant. Energy storage systems expected to play a crucial role in the Philippine market for moving the energy transition forward to a more sustainable energy future. Gov't bets on battery energy storage to power the Philippines. The Philippines is betting on battery energy storage systems (BESS) to achieve its ambitious renewable energy (RE) targets and build a more sustainable energy future. Aboitiz Power Pioneers Hybrid BESS Project in the Aboitiz Power Corporation, one of the Philippines' major utilities, has launched a project that reflects this shift toward hybrid infrastructure. The company is constructing a 30-megawatt hybrid Battery Energy Storage System (BESS) in Batangas. DOE clears battery storage projects for grid impact. The Philippine Department of Energy (DOE) has cleared 21 battery energy storage system (BESS) projects for system impact studies (SIS) with the National Grid Corporation of the Philippines (NGCP) in May. Battery Storage System In The Philippines Fast-Tracked. In the Philippines, battery energy storage systems are still in their nascent stages. While policies like the inclusion of Integrated Renewable Energy and Energy Storage Systems in the National Energy Policy are encouraging, the Philippines Opens First Hybrid Solar and BESS in Batangas. The Philippines has officially launched its first hybrid solar and Battery Energy Storage System (BESS) facility, marking a historic milestone in the country's renewable energy development. DNV assists Philippine battery energy storage project through to completion. With BESS technology expected to support the Philippines' energy transition plans, SNAP's Magat facility in particular will enhance power-grid flexibility, mitigate power supply constraints, and support the country's net-zero goals. Battery Energy Storage System The Masinloc BESS is the first
