

Price of Class B solar panels

Based on our survey of 1,000 solar customers, the national average price for a single solar panel professionally installed is \$1,200. This means most full-size systems of between 20 and 30 panels cost between \$24,000 and \$36,000. Solar panels generate "free" electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in . That price effectively drops to \$19,873 after considering the full federal solar tax credit. In a price-sensitive solar market, it's easy to assume that all solar panels are the same -- after all, they look similar, claim the same wattage, and promise to lower your electricity bill. But here's the truth: panel grade makes all the difference -- in how your system performs, how long it lasts

As of , the average cost of solar panels in New York is \$3.30 per watt, making a typical 6.9 kilowatt (kW) solar system \$16,632 after claiming the 30% federal solar tax credit now available. This is higher than the average price of residential solar power systems across the United States, which Solar panels cost \$1,200 per panel, depending on the type of panel, home size, energy usage, and labor.
