and hybrid energy storage projects. "price on" and "price for"; 'A price on' connotes 'a price set/levied on' (probably not the actual words) and is more seller-orientated. 'The price for' is nuanced less towards the involvement of the seller, meaning Price point means a point on a scale of possible prices at which something might be marketed; its meaning is different from the meaning of price, which is (principally, but not only) A word for price after tax and service charge but before discount<sup>10</sup> Taken from here: The net price is the price pre-tax, and the gross price should be the price including tax. backed up by here: you know a price after tax (the Gross price) but want to find "Prices of" vs "prices for"; The preposition "OF" is used here to indicate that the price belongs to/is used in relation with prices of spare parts.
