

## Prices of household energy storage in Ireland

On average, a 5kW battery in Ireland can cost between EUR1,700 and EUR3,000, depending on the brand and storage capacity. This price range usually suits most homes that install one battery for daily energy use. Keep in mind that installation and equipment quality can also affect the total. In Ireland, demand for home battery storage systems -- even without solar panels -- is growing rapidly as homeowners look to reduce costs and gain energy independence. Whether you have solar panels and want to store excess energy to power your house at night, or you're on a smart tariff and want to make the most of your surplus energy to storing cheap, night-rate electricity, our solar battery guide has everything you need to know including how much you can save.

**What is a home storage battery?** Home batteries store electricity generated from solar panels or other sources, so you can use it when needed. The graphs below show the average natural gas and electricity prices to business and households across all consumption bands in the Euro Area and the EU-27. They also show the weighted average across all bands in Ireland. Up to the first half of 2022, the weightings for the Euro Area and the EU-27 were based on the number of households. Battery storage working alongside solar panels can help homes and businesses to maximise their renewable energy usage and reduce their reliance on the grid. A battery will add to the cost of getting solar panels, but can also enable you to use more of the electricity they generate to save more.

**A 5kW battery is a type of energy storage system used to store electricity.** It is often used with solar panels to keep the extra energy they produce during the day. This stored energy can then be used when the sun is not shining, like at night or on cloudy days. A 5kW battery can be used in many ways.
