

## Pulling solar module containers

When the container is unloaded: When using the fuel forklift, adjust the height of the forks from the ground, the forks into the short side of the pallet, after the forks into the bottom, lift the modules at an appropriate height (the tilt Angle required to lift the modules &lt;2&#176;), the smaller the distance from the ground when the forklift out of the container door, ensure that the height of the forks from the ground and the distance from the goods to the top of the container is not more than 80mm;The arm length of the forklift mechanical arm is required to lift the modules from the short side of the pallet with a fork (the height of the forklift is required to be <=40mm from the ground), and the modules are moved out slowly. PV Module Unpacking, Handling and Storing GuideThis guide serves as a reference for inspecting, transporting, unpacking, handling and storing LONGi PV solar modules to ensure safe practices for you and the modules. Unloading Handling & Storage Manual This manual provides comprehensive guidelines for the safe and efficient Unloading and storage of solar photovoltaic (PV) modules manufactured and supplied by JAKSON Engineers Limited. Safe Unloading Solar modules from the Container Discover the safest methods for unloading solar modules at your project site. This video covers proper lifting techniques, necessary PPE, and efficient teamwork to ensure the safety of Packaging Datasheet1 To ensure the safety of loading, unloading, unpacking. and storage of PV modules, please read this manual carefully. When you need to unpack and install the modules, you can search and Unloading & Unpacking of Solar Modules Please read these instructions carefully before unloading and unpacking the solar modules. They provide important information and guidelines for the safe unloading and unpacking of the solar PV Modules Unloading & Unpacking Manual To ensure the safety of unloading of PV modules, please read this manual carefully. In the process of unloading, the forklift should be selected reasonably according to the size and Best practices for handling, unpacking and storing And when it's time to start moving the solar modules to be installed, always have two people lift and carry each module. This safety recommendation is imperative as the heavier, large-format Solar PV Module Handling, Storage, Installation Thank you for choosing Citizen Solar PV modules. This manual contains information regarding handling, storage, installation, operation, maintenance and safety handling of Citizen Solar Unloading & Unpacking of Solar Modules Please read the following safety instructions carefully before unloading and unpacking your solar modules. It is crucial to follow the outlined measures and guidelines for the safe unloading and Skill: How to correctly and safely unload the solar &#183; When unloading on the platform or ground, steel plate pads or tooling shall be used to assist in moving the goods out of the container smoothly to avoid module bumps caused by the gapPV Module Unpacking, Handling and Storing GuideThis guide serves as a reference for inspecting, transporting, unpacking, handling and storing LONGi PV solar modules to ensure safe practices for you and the modules. Safe Unloading Solar modules from the Container Discover the safest methods for unloading solar modules at your project site.
