

## Qatar Smart Energy Storage Project

The project is designed to capture and permanently store up to 4.1 million metric tons of CO<sub>2</sub> per year, significantly expanding the country's CCS portfolio. QatarEnergy said the project reinforces its strategy to integrate large-scale carbon management across its LNG value chain. Qatar Energy explained in a statement today that the project will capture and sequester up to 4.1 million tons of carbon dioxide annually, making it one of the largest projects of its kind in the world, and placing the State of Qatar at the forefront of countries in the world working to capture and sequester carbon on a large scale, enhancing its leadership role in providing responsible and sustainable energy. The new project will capture and sequester up to 4.1mn tons of CO<sub>2</sub> per year, making it one of the world's largest of its kind and placing Qatar at the forefront of global large-scale carbon capture deployment, reinforcing its leadership role in providing responsible and sustainable energy. Envisioned to become one of the largest of its kind in the world, QatarEnergy's CCS project will capture and sequester up to 4.1 million tons of CO<sub>2</sub> per annum (mtpa), which is anticipated to place Qatar at the forefront of global large-scale carbon capture deployment, reinforcing its role in providing responsible and sustainable energy. Samsung Secures Contract For Major Qatar Samsung C& T has been awarded the engineering, procurement and construction (EPC) contract for a new carbon capture and storage (CCS) project in Qatar, set to become one of the largest globally once Qatar news agency Doha, November 02 (QNA) - QatarEnergy has awarded Samsung C& T Corporation the engineering, procurement, and construction (EPC) contract for a landmark carbon capture and QATAR LAUNCHES FIRST EVER STORAGE PROJECT USING Qatar plans new energy storage project Qatar Free Zones Authority (QFZ) and Samsung C& T Corporation signed an agreement to launch green and digital infrastructure projects, including Qatar Energy grants &quot;Samsung&quot; Engineering, procurement and Qatar Energy has awarded Samsung C& T the engineering, procurement and construction (EPC) contract for a major CO<sub>2</sub> capture, sequestration and storage project, which QatarEnergy handpicks contractor for CCS project set to Qatar's state-owned oil and gas giant QatarEnergy has chosen Samsung C& T Corporation as the contractor, which will breathe life into a giant carbon capture and QatarEnergy awards EPC contract for 4.1MTPY world-scale QatarEnergy has awarded Samsung C& T Corporation the engineering, procurement, and construction (EPC) contract for a landmark carbon capture and sequestration (CCS) QatarEnergy awards Samsung C& T carbon QatarEnergy's decision to award Samsung C& T the EPC contract for its massive carbon capture and storage project is a significant milestone in the global shift toward cleaner energy. By aiming to capture QatarEnergy Energy Storage and Battery Initiatives for : Key Explore QatarEnergy's strategic shift towards renewable energy & battery storage. Discover their investments in solar power, global partnerships, and vision for a sustainable future. QatarEnergy Awards EPC Contract for 4.1 MTPA Carbon The project aims to capture and store up to 4.1 million tons of CO<sub>2</sub> annually, positioning it among the world's largest CCS initiatives. This milestone further strengthens Qatar's role as a global Qatar Energy Storage Warehouse Design Bidding: Key Insights a desert nation better known for fossil fuels and FIFA tournaments is now
