

## Small solar system prices

As of , the average cost of residential solar panels in the U.S. is between \$15,000 and \$25,000 before incentives. This typically translates to about \$2.50 to \$3.50 per watt of installed capacity (more on price per watt below). A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in . That price effectively drops to \$19,873 after considering the full federal solar tax credit. NOTE: Under the "One Big Beautiful Bill Act" signed in July , the federal solar tax credit is set to expire at the end of the year. At The Inverter Store, we often get requests regarding solar setups for small homes or cabins that are off the grid or want to be. [Show More >](#)

### 720 WATT SOLAR PANEL BASE KIT FOR OFF GRID | BACK UP POWER - CUSTOMIZABLE STARTING AT \$16,600

With utility rates rising and the 30% solar tax credit going away at the end of the year, installing solar in 2024 offers more cost-savings potential than ever before. So, what's standing in the way of American homeowners and solar panels? The biggest hurdle is often the perceived "upfront cost" of solar panel costs range from \$16,600 to \$20,500 for the average 6.5 kW system, but prices can vary from as little as \$7,700 for smaller solar systems to upward of \$34,700 for larger systems. To find the most up-to-date solar panel costs in 2024, we compared research from the U.S. Department of Energy. When it comes to "small" solar panels, we generally think under 200 watts. These are durable, high-efficiency, small solar panels for sale that our customers often use for remote transmitters, battery charging, electric gate openers, RVs, boats, 12v solar panels etc
