

The world's first sodium-ion energy storage battery

China launches world's first grid-forming sodium-ion battery storage plant The Baochi Storage Station in Yunnan integrates lithium and sodium-ion technologies at scale, a global first, aiming to stabilize renewable energy and cut costs as China accelerates its energy transition. The Baochi Storage Station in Yunnan integrates lithium and sodium-ion technologies at scale, a global first, aiming to stabilize renewable energy and cut costs as China accelerates its energy transition. China Southern Power Grid (CSG) announced on May 26 the commissioning of the Baochi Energy Storage Station. China has officially launched the world's first grid-forming Sodium-ion Battery energy storage facility. The Baochi Energy Storage Station, located in Yunnan province, comes as a national pilot project and serves as a milestone in the global energy storage industry. Announced by China Southern Chinese EV giant BYD has launched what an executive claimed is the 'world's first high-performance' sodium-ion BESS product, using its proprietary form factor Long Blade Battery cell. Posting on business networking site , BYD Energy Storage's UK and Ireland head Kai Wang announced the On September 17, Chinese battery maker EVE Energy announced the successful connection of its first large-scale sodium-ion battery storage system to the grid at its Jingmen base. This marks the company's transition to commercial operation for this advanced energy storage technology. The sodium-ion During its Super Tech Day, the Chinese giant unveiled three breakthrough batteries for electric vehicles: Freevoy Dual-Power, Naxtra, and Shenxing Superfast Charging CATL, the Chinese battery manufacturer and global leader in energy storage, has officially launched Naxtra, the world's first China's biggest refiner, Sinopec, has set up a venture with South Korea's LG Chem to develop sodium-ion batteries for the storage industry and for "low-speed" electric vehicles, the company said. This is the first foray of Sinopec in the battery industry. LG Chem said, as quoted by Korean media China launches world's first grid-forming sodium China launches world's first grid-forming sodium-ion battery storage plant The Baochi Storage Station in Yunnan integrates lithium and sodium-ion technologies at scale, a global first, aiming to stabilize China Debuts World's First Grid-Forming Sodium-Ion Battery Plant China has officially launched the world's first grid-forming Sodium-ion Battery energy storage facility.
