

## Tunisia Wind Solar Energy Storage Project

RENEWABLE ENERGIES: The ELMED interconnection project, which will link Tunisia to Italy by , will play a key role in stabilizing energy supply, while supporting the energy transition in Tunisia and Europe. Tunisia seeks consultants for 400 MW solar-plus The World Bank is looking to recruit a technical consultant that will advise on a proposed large-scale solar-plus-battery storage project in Tunisia. The consultancy work will centre around Tunisia: Qair signs project agreements with the Tunisian Qair is an independent renewable energy company developing, financing, building, and operating solar, wind, waste-to-energy, storage and green hydrogen production assets. Tunisia's Offshore Wind Project: A Step Toward Tunisia's offshore wind project is a transformative step in its renewable energy journey. With the support of AfDB, SEFA, and innovative financial modelling, this initiative is set to position Tunisia as a renewable Tunisia awards 500 MW of solar projects in tenderThe solar plants are estimated to save 250,000 tonnes of natural gas per year, valued at roughly USD 125 million. As part of the same programme, the ministry expects to receive bids for at least two wind Tunisia's Push for Renewable Energy: Progress Tunisia's push for renewable energy reflects significant progress through ambitious solar and wind projects, yet challenges such as regulatory hurdles, financing gaps, and grid infrastructure limitations Tunisia Awards 500 MW in Solar Power ProjectsTunisia has signed contracts for four photovoltaic projects, totaling 500 MW, as part of the initial phase of its 1.7 GW tender. Set to be operational by , these projects aim to generate 1 TWh annually, World Bank Invites Consultants For Tunisian Solar The World Bank has launched a call for interested consultants to conduct a technical study for a 350 MW to 400 MW solar and battery storage project in Tunisia. TuNur - Renewable energy, storage and TuNur is developing a series of renewable energy projects that will produce low-cost green electrons and molecules in Tunisia for export. Each export project consists of three components: Green Energy Production in Tunisia: The World In June , the World Bank approved US\$268.4 million in financing for the Tunisia-Italy interconnector (ELMED) project that will link energy grids between Tunisia and European markets, with the eventual RENEWABLE ENERGIES: The ELMED interconnection project, which will link Tunisia to Italy by , will play a key role in stabilizing energy supply, while supporting the energy transition in Tunisia and Europe.
