

## Vietnam Mobile Energy Storage Project

Pioneering Innovation with Vietnam's BESS Pilot The pilot BESS project aims to create an ecosystem that supports the development of robust infrastructure, the introduction of policy reforms, and collaboration important for a smooth transition to clean Marubeni, VinGroup in 'first of a kind' Vietnam The project follows a May Memorandum of Understanding (MoU) between Marubeni and VinGroup's energy storage arm, announced just a few days after Vietnam's government approved a ADB supports Vietnam in developing energy Alongside Mongolia and Cambodia, Vietnam will receive technical and financial support to promote energy storage solutions - a key factor in transitioning to a low-carbon economy. Development of Battery Energy Storage Systems in Vietnam Vietnam began implementing BESS systems from . However, due to the lack of a complete set of policies and regulations for BESS development, most BESS systems in Vietnam are Commencement of a Battery Energy Storage Marubeni Corporation, through its wholly-owned subsidiary Marubeni Green Power Vietnam Co., Ltd, has commenced a battery Vietnam Advances Ambitious Battery Storage Plans Vietnam has set targets of 10,000-16,300 MW of battery storage by under its revised power plan, while formalizing BESS in law and working on tariffs, licensing, and incentives to scale from pilot Current Status Of BESS Applications In The Although the potential for BESS applications is high, particularly with the rapid development of renewable energy in Vietnam, the country currently lacks any large-scale grid-connected BESS projects. Vietnam Advances Sustainable Energy with DPPA Solar and Once completed, the three floating solar projects will have a combined installed capacity of 864 MW and will supply clean electricity to major consumers via the DPPA Embracing battery energy storage systems to power Vietnam's Integrating BESS into Vietnam's energy infrastructure demonstrates promising prospects for facilitating the nation's energy transition. By storing excess energy during periods ACEN and AMI Renewables develop Vietnam's Co-funded by a grant from U.S. Mission Vietnam, the pilot project will demonstrate how energy storage can help Vietnam integrate more renewable energy into its power system to meet ambitious climate goals. Pioneering Innovation with Vietnam's BESS Pilot Project The pilot BESS project aims to create an ecosystem that supports the development of robust infrastructure, the introduction of policy reforms, and collaboration important for a Marubeni, VinGroup in 'first of a kind' Vietnam BESS project The project follows a May Memorandum of Understanding (MoU) between Marubeni and VinGroup's energy storage arm, announced just a few days after Vietnam's ADB supports Vietnam in developing energy storage systems to Alongside Mongolia and Cambodia, Vietnam will receive technical and financial support to promote energy storage solutions - a key factor in transitioning to a low-carbon Commencement of a Battery Energy Storage System Demonstration Project Marubeni Corporation, through its wholly-owned subsidiary Marubeni Green Power Vietnam Co., Ltd, has commenced a battery energy storage system ("the BESS") Vietnam Advances Ambitious Battery Storage Plans Vietnam has set targets of 10,000-16,300 MW of battery storage by under its revised power plan, while formalizing BESS in law and working on tariffs, licensing, and Current Status Of BESS Applications In The Vietnamese Although the potential for BESS applications is
