

What Batteries Are Used in Outdoor Power Supplies

What is a battery used for? Batteries are the power sources for thousands of tools, machines, devices and gadgets. Batteries help you keep track of time, start your laptop, check your temperature or power the drill you use to build a patio deck. This guide explains the features and characteristics of many different types of batteries. What is a lithium ion battery? Lithium-ion batteries (Li-ion) can be found in most portable electronic devices like smartphones, portable power tools and motorized toys. Li-ion batteries are sold in disposable and rechargeable versions. They contain fewer toxic metals than other batteries. What types of batteries are best for low-drain devices? These different types of batteries are best suited for low-drain devices. Most zinc-carbon batteries have a short shelf life. Super heavy-duty zinc-carbon batteries can last up to five years, but these types of batteries are prone to corrosion once they've lost their charge. Zinc-carbon batteries are not recyclable. What are the different types of batteries? These types of batteries have a shelf life of five years or longer. Alkaline batteries consist of D, C, AA, AAA, AAAA, N, 9-Volt and Button. AAAA batteries aren't as commonly known - and may be considered speciality batteries in some capacity - but they can be used in items such as LED penlights, laser pointers and more. What are lithium batteries used for? Lithium batteries are widely used in consumer devices that require heavy electrical current usage, from thermometers and remote car fobs to critical medical devices like pacemakers. These types of batteries cost more but are designed to meet the demand. How do you store a battery? Store batteries at room temperature. Excessive heat or cold makes a battery wear out faster. Do not store with coins, paper clips or other metal objects. Batteries may short-circuit and heat up. Remove batteries from devices you don't use all the time. This extends their operating life. Replace all batteries at the same time.
